Technology Management

Subject	Technology Management			
Code	V05G300V01801			
Study programme	Degree in Telecommunications Technologies Engineering			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	6	Mandatory	4th	2nd
Teaching language	Spanish English			
Department				
Coordinator	González Castaño, Francisco Javier			
Lecturers	Docio Fernández, Laura Fernández Vilas, Ana González Castaño, Francisco Javier López Ardao, José Carlos Ramos Merino, Mateo			
E-mail	javier@det.uvigo.es			
Web	http://http://fatic.uvigo.es			
General description	This course provides skills in design, management and leadership of technological projects. This includes detection of needs, technological surveys, team creativity techniques, project management, property definition and protection, and business models. The course is taught in Spanish and English.			

Competencies

Code	
B7	CG7: The ability to analyze and assess the social and environmental impact of technical solutions.
B8	CG8: To know and apply basic elements of economics and human resources management, project organization and planning, as well as the legislation, regulation and standarization in Telecommunications.
C54	(CE54/PY1) The ability to elaborate the proposal of technical projects according to the specified requirements in a public competitive bidding.
C55	(CE55/PY2) The ability for technical direction of telecommunication project.
C56	(CE56/PY3) The ability to manage telecommunication project human resources and economic.
C57	(CE57/PY4) The ability to elaborate technical reports and for the follow up of a telecommunication project.

Learning outcomes

Expected results from this subject	Training and Learning Results	
- To analyze the technical and economic feasibility of a project. Project budgets.	B7 B8	C55 C56
- Learn how to find statistical information and indicators		C57
- Learn how to perform technological surveys and consulting		
- Learn how to apply the main certification regulations	B8	
- Project reporting		C54 C55 C56 C57
- Project planning and management	B8	C54 C55 C56
- Sociological and human aspects of projects.		C55 C56
- Telecommunciations, safety and environmental regulations	B7	C54

- To develop models for the creation of enterprises, products and services

B8

C55

- To propose business models in telecommunications

C56

Contents

Topic	
Project design and management	<ul style="list-style-type: none"> - Definition of technical goals - Translating goals into tasks - Planning the project - Project resources - Human team. R&D profiles - Budget - Tracking project evolution
Identifying and interpreting needs	<ul style="list-style-type: none"> - Gathering requisites - Translating needs into technical objectives - Technological perspective. Hype cycles - Sources and methods for technical surveys
Creativity techniques	<ul style="list-style-type: none"> - Research, development and innovation - Team methods to boost creativity - Is my idea original? Formulating and evaluating it
Collaborative Tools	<ul style="list-style-type: none"> - Purpose - Tools - Tool-assisted collaborative techniques
Legal aspects	<ul style="list-style-type: none"> - Types of property: Intellectual and industrial - Technological actives vs. legal property. Models, patents. Licenses - Spanish case/international case. Europe and the US. Internationalization hints - CIN/352/2009 regulation
Business models. Entrepreneurship.	<ul style="list-style-type: none"> - Product proposal - Risk analysis - Customer survey - From the idea to the business plan - First steps towards the creation of an enterprise

Planning

	Class hours	Hours outside the classroom	Total hours
Master Session	24	38	62
Projects	4	20	24
Practice in computer rooms	28	36	64

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Master Session	Oral presentation of the main concepts of the course by the professors, supported by multimedia. Lectures by experts. Through this methodology the competencies CG7, CG8, CE54, CE55, CE56 and CE57 are developed.
Projects	Group project to be presented during class hours A of the last week. Through this methodology the competencies CE54, CE55, CE56 and CE57 are developed.
Practice in computer rooms	Practice on aspects of specification of requisites, creativity and project design and tracking using computer tools. Through this methodology the competencies CE54, CE55, CE56 and CE57 are developed.

Personalized attention

Methodologies	Description
Master Session	The professors will be available during tutoring hours to clarify any doubts on master session contents. Tutoring hours will be published at the beginning of the course.

Projects	All techniques in the course will be applied to the creation and planning of a project. The project will be performed in groups. At the beginning of the course, the professors will notify a working field for the course (ex. medical applications, intelligent furniture). Projects will focus on product proposals in that specific working field. Nevertheless, the professors will track individual performance, and at the final defence there may be individual questions. Personalized individual attention on these aspects will take place during official tutoring times or via e-mail at any time.

Assessment				
	Description	Qualification	Training and Learning Results	
Master Session	Exam	40	B7 B8	C54 C55 C56 C57
Projects	Individual defense (committee)	40		C55 C56 C57
Practice in computer rooms	Evaluation of partial results+exam	20		C55 C56 C57

Other comments on the Evaluation

Continuous evaluation consists of:

- Individual exam (Maximum 4 points). Official calendar.
- Intermediate practical test (Maximum 2 points).
- Final project (Maximum 4 points).

To pass the course, the final student score (as the sum of the previous activities) must be 5 points or more. Maximum score is 10 points.

The project will be performed in groups. Individual scores will be assigned according to student interaction in B hours and the part corresponding to each student in the public project defence.

FINAL EVALUATION:

It will consist in an exam with theoretical and practical parts in the official date. The practical part will cover the same content as the continuous evaluation along the course.
