

IDENTIFYING DATA

Physical chemistry 2

Subject	Physical chemistry		
	2		
Code	V11G200V01403		
Study programme	(*)Grao en Química		
Descriptors	ECTS Credits	Choose	Year
	9	Mandatory	2nd
Teaching language	Spanish Galician		Quadmester
Department			2nd
Coordinator	Fernández Núvoa, Alejandro		
Lecturers	Fernández Núvoa, Alejandro Ferro Costas, David Hermida Ramón, José Manuel Pastoriza Santos, Isabel Peña Gallego, María de los Ángeles		
E-mail	afnovoa@uvigo.es		
Web			
General description	Application of the principles and methods of Quantum Mechanics to the study of molecular structure and spectroscopy.		

Competencies

Code

A3	(*)Demostrar coñecemento e comprensión de feitos esenciais, conceptos, principios e teorías en: principios da Mecánica Cuántica e a súa aplicación na descripción da estrutura e as propiedades de átomos e moléculas
A6	(*)Demostrar coñecemento e comprensión de feitos esenciais, conceptos, principios e teorías en: principios de Termodinámica e as súas aplicacións en Química
A8	(*)Demostrar coñecemento e comprensión de feitos esenciais, conceptos, principios e teorías en: principais técnicas de investigación estrutural, incluíndo a Espectroscopía
A19	(*)Aplicar os coñecementos e a comprensión á resolución de problemas cuantitativos e cualitativos de natureza básica
A20	(*)Avaliar, interpretar e sintetizar datos e información química
A21	(*)Recoñecer e implementar boas prácticas científicas de medida e experimentación
A22	(*)Procesar datos e realizar cálculo computacional relativo a información e datos químicos
A23	(*)Presentar material e argumentos científicos de xeito oral e escrita a unha audiencia especializada
A27	(*)Monitorizar, mediante observación e medida de propiedades físicas e químicas, acontecementos ou cambios e documentalos e rexistralos de xeito sistemático e fiable
A28	(*)Interpretar datos derivados das observacións e medicións do laboratorio en termos do seu significado e relationalos coa teoría adecuada
A29	(*)Demostrar habilidades para os cálculos numéricos e a interpretación dos datos experimentais, con especial énfase na precisión e a exactitude
B1	(*)Comunicarse de forma oral e escrita en polo menos unha das linguas oficiais da Universidade
B3	(*)Aprender de forma autónoma
B4	(*)Procurar e administrar información procedente de distintas fontes
B5	(*)Utilizar as tecnoloxías da información e das comunicacíons e manexar ferramentas informáticas básicas
B6	(*)Manexar as matemáticas, incluíndo aspectos tales como análise de erros, estimacións de ordes de magnitud, uso correcto de unidades e modos de presentación de datos
B7	(*)Aplicar os coñecementos teóricos á práctica
B8	(*)Traballar en equipo
B9	(*)Traballar de forma autónoma
B12	(*)Planificar e administrar adequadamente o tempo
B13	(*)Tomar decisións
B14	(*)Analizar e sintetizar información e obter conclusóns
B15	(*)Avaliar de modo crítico e construtivo o entorno e a si mesmo

Contents

Topic

Electronic Structure of Diatomic Molecules.	- The Born-Oppenheimer Approximation. - The Hydrogen Molecule-ion. OM Method. - The Hydrogen Molecule. OM and Valence Bond Methods. - OM Method for Homonuclear and Heteronuclear Diatomic Molecules. - The Hartree-Fock Method. Basis Sets.
Electronic Structure of Polyatomic Molecules.	- OM Method in Polyatomic Molecules. - Semiempirical Methods. The Hückel Method. - Calculation of Molecular Properties - Other Methods in Computational Chemistry.
Introduction to Molecular Spectroscopy	- Matter-Radiation Interaction. A General Approach. - Transition Dipole Moment. Selection Rules. - Intensity and Position of the Spectral Transitions..
Rotational Spectroscopy.	- Pure Rotational Spectra of Diatomic Molecules.Rigid Rotor Model and and Elastic Rotor Model. - Pure Rotational Spectra of Polyatomic Molecules.
Vibrational Spectroscopy.	- Vibration Spectra of Diatomic Molecules. Harmonic Oscillator Model and Anharmonic Oscillator Model. - Vibration-Rotation Spectra of Diatomic Molecules. - Vibration-Rotation Spectra of Polyatomic Molecules. - Raman Spectroscopy.
Electronic Spectroscopy.	- Electronic Spectra of Diatomic Molecules. - Vibrational Structure. The Franck-Condon Principle. - Fine Rotational Structure. - Electronic Spectra of Polyatomic Molecules.

Magnetic Resonance Spectroscopy.	<ul style="list-style-type: none"> - Introduction to Nuclear Magnetic Resonance. - Chemical Shift. - Spin-Spin Interaction. Coupling Constant. - Electronic Spin Resonance Spectroscopy.
Practices of Chemical Thermodynamics (six sessions)	<ul style="list-style-type: none"> - Experimental determination of equilibrium constants using spectrophotometric and potentiometric methods. - Experimental determination of enthalpies of combustion, solution, neutralization, fusion or vaporization. - Colligative Properties. - Experimental determination of activity coefficients using potentiometric methods.
Practices of Quantum Chemistry and Spectroscopy (seven sessions).	<ul style="list-style-type: none"> - Theoretical study of the molecular structure of H₂ and H₂⁺ molecules. - Theoretical study of the molecular structure of other diatomic molecules. - Conformational isomerism and internal rotation in n-butane. - Prediction, theoretical interpretation and resolution of the vibration-rotation spectrum for HCl. - Electronic Spectroscopy: Spectrum of I₂ in gas phase.

Planning

	Class hours	Hours outside the classroom	Total hours
Master Session	26	39	65
Seminars	26	39	65
Laboratory practises	45.5	4.5	50
Autonomous troubleshooting and / or exercises	0	10	10
Long answer tests and development	4	8	12
Reports / memories of practice	0	9	9
Short answer tests	2	5	7
Multiple choice tests	0	4	4
Practical tests, real task execution and / or simulated.	1	2	3

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Master Session	
Seminars	
Laboratory practises	
Autonomous troubleshooting and / or exercises	

Personalized attention

Methodologies	Description
Master Session	
Seminars	
Laboratory practises	
Autonomous troubleshooting and / or exercises	

Tests

	Description
Long answer tests and development	
Reports / memories of practice	
Short answer tests	
Multiple choice tests	
Practical tests, real task execution and / or simulated.	

Assessment

	Description	Qualification
Laboratory practises		ata 12,0
Autonomous troubleshooting and / or exercises		ata 7,0
Long answer tests and development		ata 42
Reports / memories of practice		ata 6,0

Short answer tests	ata 14
Multiple choice tests	ata 7,0
Practical tests, real task execution and / or simulated.	ata 12,0
