Methodologies	Description
Lecturing	It is an exhibition of the basic contents of each subject. It boosts the participation of the *alumnado by means of the presentation of questions and exercises to resolve during the exhibitions. The exhibition of contents is supported by presentations *PowerPoint that will go up to the virtual Platform Subject.
Laboratory practical	The practices of laboratory pose so that the students/ace have a direct contact with the experimentation of where arise the contents developed in the sessions *magistrales. In these practical it is necessary to signal two types of implication by part of the students/ace: collaboration in practices and assistance to practices. The collaboration in the practices involves that the/the student/to turns into experimentalist/to and holds responsible to develop the experiment in the class. The assistance to practices involves that the/the student/to turns into subject experimental and participates in a group of control or experimental. They pose a total of 13 classical experiments related with the contents of the *temario (perception, memory and creativity). Each experiment is designed to be carried out by a maximum group of two students that will commission to develop it in the practical class (under the supervision of the professor). The rest of the students participate in the experiment like experimental subjects forming part of a group of control or experimental. For the collaboration in experiments will create groups of, at most, two students/ace, and so many groups like experiments propose for each one of the five groups of practices. The election of the collaboration in practices will realise in the Virtual Platform, where will find a summary of each experiment, as well as the design and the necessary material to carry out them. It will not be able to collaborate in more than an experiment.
Mentored work	WORKS *TUTELADOS. 1. WORKS OF ARTISTS: it will choose an artist whose work, creative process or experience was related with the thematic proposal in the *asignatura. It treats of *reflexionar on the work of the/the artist through the psychological process. The work consists of a small introduction in which it speaks of the psychological process, a *contextualización in which it includes the historical moment and the own life of the/the artist, to finalise with the analysis of the work and his projection in the thematic that analyses . INDEX: introduction, context, analysis of the work of the artist, bibliography. The minimum extension of the work *mecanografiado is of 15 folios to double space with the type of letter *Arial 12. It has to include bibliography and be *paginado. The work will be individual. 2. GAME TO TEACH ART: create a game (of letters, a traditional game like *parchís, goose, etc.) to teach art. The aim is *reflexionar on the evolutionary stages in the infancy-adolescence and take them into account to design the game headed to approach to the boy/to to the world of the art. Can include the elements that consider adapted, but will have to justify: the use of the colour, determinate forms, elements of motivation (like them same or people linked inside the work[]), etc. Is necessary to generate the norms of the game (can take into account norms that already exist). Apart from the game and of the norms, will deliver a report in which they justify the distinct characteristics of the game in function of the evolutionary stage to the one who goes directed. INDEX: evolutionary stage, characteristics of the game, justification and bibliography. The minimum are 10 folios to double space and the type of letter, *Arial 12. 3. IMAGES GUIDED: choose a work of a/to artist and remove of the picture a character (a point, a line, a character[]) that will serve us of guide to know to the/to the artist and his work. The report will have a minimum extension of 15 folios to double space with the type of letter *Arial 12. All the works have to include a cover with the title of the work, the name and surnames of the/of the author/to, academic year and *asignatura. Besides, they have to include bibliography and be *paginados. The presentation of works will do in *PowerPoint, previous review of the professor. The maximum time of exhibition are 20 minutes. In the Virtual Platform of

the University (*FAITIC), in the PRACTICAL section, will find the information on the distinct

alternative, with the possibility to enter the corresponding election.

ICT suppoted practices (Repeated, Dont Use)

An important part in this section is the proposal by part of the students of questions type test related with the distinct subjects of the *asignatura. The questions will have 4 alternatives of answer, of which only one will be correct. Has to include *feedback in the alternatives of answer. The questions formulated that they have the seen well of the professor can form part of tests it type test to evaluate the contents of the masterclasses. They will propose other activities to work the distinct contents of the *asignatura: questionnaires, exercises of *autoevaluación, studies of case, analysis of works, participation in forums and utilisation of the *WIKI. These exercises will develop in the Virtual Platform SUBJECT, with dates of delivery and with *feedback by part of the professor.

Presentation

The presentations and exhibitions, so much of works *tutelados as of readings, will realise by means of *PowerPoint, previous review of the professor. The time of maximum exhibition will oscillate between 15 and 20 minutes (including the time of answer to possible ask after part of the mates).

Methodologies Description

Laboratory practical

The whole process will be supervised. The practices of laboratory it pose so that the students have a direct contact with the experimentation of where arise the contents developed in the lectures. In these practical the students can have two types of implication: collaboration in practices and assistance to practices. The collaboration in the practices involves that the student turns into experimenter and holds responsible to develop the experiment in the class. The assistance to practices involves that the student to turns into subject experimental and participates in a group of control or experimental. There are a total of 13 classical experiments related with the contents of the *temario (perception, memory and creativity). The rest of the students participate in the experiment like experimental subjects forming part of a group of control or experimental. For the collaboration in experiments will create groups of, at most, two students. The experiments are the same in each one of the five groups of practices. The election of the collaboration in practices will make in the faitic Virtual Platform, where will find a summary of each experiment, as well as the design and the necessary material to carry out them. It will not be able to collaborate in more than an experiment.

Mentored work

Supervised works. You can choose one of this three alternatives: 1. WORKS OF ARTISTS: it will choose an artist whose work, creative process or experience was related with the thematic proposal in the subject. It treats of reflect on the work of the artist through the psychological process. The work consists of a small introduction about the psychological process, context in which it includes the historical moment and the life of the artist, to finalise with the analysis of the work and his projection in the thematic that analyses . INDEX: introduction, context, analysis of the work of the artist, bibliography. The minimum extension of the work is of 15 folios paged (word or pdf) to double space with Arial 12. It has to include references . The work will be individual. 2. GAME TO TEACH ART: create a game (card game, a traditional game) to teach art. The aim is reflect on the evolutionary stages in the chilhood-adolescence and take them into account to design the game to bring the boy/girl closer to the world of the art. Can include the elements that consider adapted, but will have to be justify: the use of the colour, determinate forms, elements of motivation. Is necessary to generate the norms of the game (can take into account rules that already exist in other games). Apart from the game and of the rules, will deliver a report in which they justify the distinct characteristics of the game in function of the evolutionary stage to the one who goes directed. INDEX: evolutionary stage, characteristics of the game, justification and bibliography. The minimum are 10 folios (word or pdf) paged to double space and Arial 12. 3. IMAGES GUIDED: choose a work of a artist and choose of the picture a character (a point, a line, a character

∩) that will serve us of guide to know to the artist and his work. All has to be documented and argued. Know the evolutionary stage to see what is what can interest more to the boys of this age (motivation) and take into account the cognitive development to adapt the content to the age. The work will have to contain a report with the following steps: INDEX: introduction (information on the evolutionary stage to the one who goes directed and why), present to the quide, do a trip to know to the/to the artist, know his city and his historical moment. For example: We go to visit to the artist to his house, go to see his workshop and teachs us his works (one or two, the most representative). The report will have a minimum extension of 15 folios (word or pdf paged) to double space, Arial 12. For all aternatives: All the works have to include a cover with the title of the work, the name and surnames of the student, academic year and subject. Besides, they have to include references. The presentation of works will do with PowerPoint, previous review of the professor. The maximum time of exhibition are 20 minutes. In the Virtual Platform of the University (FAITIC), in the PRACTICAL section, will find the information on the distinct alternative.

Introduction to semiotics.	De Saussure defined semiotics as a science that studies the life of the signs in the breast of the social life. The emphasis in the relation of the sign with the his social context will be fundamental in this approximation. The sign erects in place of something by consensus and common use, no by need. Understanding the arbitrariness of the signs is the starting point to understand that the representation is never natural, neither objective, neither innocent: independently of the his pretensions, it is always impregnated of ideology.
The functions of language. Factors of communication in the work of art.	The ranking of Roman Jakobson of the functions of the language (referencial, expressive, conative, phatic, poetic and metalingual) is the starting point to stimulate the critical faculty when reading. Our position as readers is conditioned by unspoken assumptions of which we are unaware . The knowledge of how language works helps to understand that significant processes are not simple transmission of meanings already established , but the place in which reality is constructed.
Codes of representation. Syntax of the image.	The question of how meaning works is not merely formal, but formal is essential to meaning. It is the fundamental substrate on which the meanings are based. So we have to understand that each code of representation is based on certain formal and technical choices and that each formal election presupposes, in our relatively stable culture, specific meanings. What the work of art tells us is not only determined by the iconographic or narrative choices; the technique employed (for example, the stroke length, the size of an element in relation to the total image size, the use of a concrete perspective, which focuses or blurs) are involved in many of his statements .
Relations between reality, perception and representation.	Perception is not a strictly physiological process, a direct recording, but a mental construct based on the sensations, a codification of the world in iconic signs that represent it within our mind. That codification implies a concrete perspective of learned schemes, that is, the world is not experienced without mediation, it is comprehensible only inside speechs, which are historically specific structures of institutions, categories and beliefs. If there is not a perception of the world that is not mediated, there is not either a "natural" representation, since we are talking about an encoding of second grade. Despite all the romantic conceptions of art as a personal, direct and free expression, artistic creation involves a system based on a concrete languaje that we inherit through education in the parameters and conventions of a society. And the question is not only at what extent can a representation reflects reality, we must also understand that those concepts we call reality are forged, in part, through representations. Representations are not just a passive reflection of meanings and values, but active constructions of those meanings and values. Through them we grasp the world and, therefore, to a large extent they construct our idea of the world.
Transtextual relations.	All texts relate, in their writing and their reading, with the joint of texts that preceded them or surround them, so that we can speak of the existence of a transtextual context. As Barthes said, the text is entirely interwoven with appointments, references and echos. Every work of art is a palimpsesto, a text that superimposes to another, that covers it. Following the ranking of Gerard Genette, we will study five transtextual relations: paratextuality, metatextuality, architextuality, intertextuality and hipertextuality. The two last of them are employed in the appropriationist artistic practices, in an era in which the game of images has less and less to do with a (hypothetical) external reality.
Construction and deconstruction of images.	In the era of simulacra, representations are our nature. According to Baudrillard metaphor, the map of hiperreality substitutes the territory of the real. If we accept that representations are determinant in building our concept of reality, we will understand that their power is enormous. Deconstructive practices intend to put in crisis to idea of representation as a natural fact, analyzing and disassembling the ideological codes infiltrated in every dominant representation.
Modes of interpretation of the work of art.	Historical, formalist, iconogical, sociological, structuralist, psychoanalytic critical methods Along the history of the western art several ways to see and study the works of art have succeeded, based in diverse disciplines that analyze some of the more relevants aspects of art according to different periods and geographies. The diversity of approximations is an indicator that we are treating with open works, expanded by each viewer, that attracts them to his own speculative orbit. Aesthetics of the reception insists in the postestructuralist idea that the images mean only in contact with the speeches that circulate in a society.

	Description
Presentation	The students will explain to the professor, individually or in small groups, his formulations and solutions to the exercise proposed in the master class.
Lecturing	The professor will expose the contents of the subject with the help of audiovisual material. At the end of the class, she will propose a practical exercise related with the topics considered, that will develop during several weeks.
Workshops	The students will work on the exercises through photographic montages and painting, acquiring knowledge and skills in these artistic procedures.
Mentored work	"The students will solve the exercises formulated in the lecture mainly in the workshop classroom, with constant supervision from the teacher during in-person hours and autonomously during non-in-person hours. Emphasis will be placed on both conceptual and technical problems."

Lecturing	Attendance to master classes is mandatory	5	
Workshops	The acquisition of skills in the practice of the artistic procedures employed will be evaluated.	40	
Mentored wor	kThe progressive ability of the student to create images that respond to a specific communicative purpose and are neither obvious nor cryptic will be evaluated. The results of the exercises developed in the workshops will be evaluated, considering both formal and discursive aspects. The student's ability to create artistic works, emphasizing their representative, expressive, and poetic functions, and to employ the most appropriate procedures and codes of representation for their communicative purposes, will also be evaluated.	40	C25 C31 C36 C42

It will be especially taken into account the assistance to classroom, that expresses with clarity the implication and the commitment of the students. The evaluation of the ordinary announcement will be according to the schedule of each group.

In the extraordinary announcements of July and End of career the students will deliver, properly made, all the falied or not presented exercises.

Project based learning	Presentation of a small memory / project theoretical: it will value, by a part, the theoretical motivation of the project and, by another, the planning and production of the same (during the practices of laboratory) System of continuous evaluation until the delivery of the memory. Criteria of evaluation: - Understanding of the own concepts of the multiple graphic work, exposed in the masterclasses and in the participatory seminars Capacity of analysis and of relation between the different contents and his application for his own project Clarity of expression of the same Enlargement of the knowledges and of the artistic references Correct use of the own terminology and of the appointments Originality and rigour in the approach of the subject.	40	B8	C2 C5 C6 C7 C9 C12 C17 C19 C31 C32 C42 C43

It will value the production of the project, his planning, realisation and presentation according to the following criteria: Criteria of general evaluation: - System of continuous evaluation and of the works delivered (folder with a minimum of 10 images, size of matrix go in To4 and To3). - The artistic interest of the patterned images. The student will have the option to establish a debate inside the group of the class in defence of the assessment of his work. In contrary case, the professor will value this appearance unilaterally. - The understanding and correct utilisation of the technical processes, so much in the preparation and evolution of the matrices as in his correct stamping. It will value the complexity of the procedures used. - The *adecuación of the procedures that use to the project and own language. - The planning and realisation of the different stages of the evolutionary project. - The capacity of experimentation and the curiosity researcher of the student. - The coherence or incoherence of all the exercises of the student. - The assistance to class. - The participation in the dynamics of the class, so much in tasks of organisation (cleaning, acquisition and good use of collective materials, etc.) as in other possible collaborations with the group of class.	50	B8	C2 C5 C6 C7 C9 C12 C17 C19 C31 C32 C42 C43

Other comments on the Evaluation

Art and Modernity is a *asignatura shared between two professors: Susana *Cendán (80%) and Rebeca López *Villar (20%). The methodology of the *asignatura structures in practical theoretical/classes. The THEORETICAL CLASSES (2 hours to the week) consist in the oral exhibition of a series of contents supported in *sopor*tes audiovisual whose aim is that the student reach own points of view and *globalizadores on the contents of the matter.&*nbsp;The theoretical introductions initiate to the student in the territory of the History of the art of gradual and orderly form. The assistance to the theoretical classes is an indispensable requirement for the correct understanding of the contents of the program, supposing the same 5% of the value of the *asignatura.Prays *puntualidad. *desaconseja The access to the classroom once have passed 20 minutes from the start of the class. The PRACTICAL CLASSES structure in four groups or seminars of work (**P1, **P2, *P3 and **P4) of an hour of length. *nbsp; The practical classes expand and deepen in the theoretical contents of the *asignatura, allowing develop analysis on problematic concrete as well as a real and effective participation of the student. &*nbsp;The contents of the practical classes are heterogeneous and vary in function of the annual update of the contents: readings and analysis of texts, cycles of cinema, practical exercises of review of the *asignatura, artistic actions, debates on problematic related with the creativity, exits of studies, etc. So that *contabilicen the practical classes, only will allow 2 FAULTS And justified. & *nbsp; Prays the maximum *puntualidad. *desaconseja The access to the class once have passed 20 minutes of the beginning of the practical class. The training of the groups of work Has a character limited in the time. The professor will indicate the term for the forming of the groups. On the hours of autonomous work of the student. The educational model of the *EEES (European Space of Upper Education) pleads for educational methodologies oriented to favour the active learning of the student, his implication and autonomy. The learning does not begin and finishes in the classroom. The student, like protagonist of his process of learning, has to assume the paper of main actor and act consistently, so much inside as it had been of the classroom: his training depends to a large extent of the work that realises had been of the classroom. Like this it contemplates it the system of transfer of credits *ECTS.In definite, the evaluation of the *asignatura Art and Modernity *conjuga the modalities that detail to continuation:1. A evaluation continued Based in the assistance and realisation of the exercises and activities proposed to the groups of work in his corresponding seminar. &*nbsp; The belonging to a group of work is immovable. It will not value the realisation of exercises had been of the group of corresponding work. Yes the followup of the work is discontinuous (more than two faults) will not value .

Will take into account to *puntualidad of the deliveries of the exercises in the dates stipulated. The fault of *puntualidad in the deliveries will value negatively.

The evaluation continued supposes a 35% of the value of the *asignatura.2. A final evaluation formalised in a proof of examination of character *sumatorio, And whose value supposes a 65% of the total of the *asignatura. The application of the present proof allows him to the professor analyse results and obtain individual assessments of each student at the end of the *cuatrimestre.IMPORTANT EXPLANATIONS1. So that *contabilicen the practical (that is to say, so that these do average with the theoretical examination) it will be necessary to take out a minimum of 4 points in the theoretical proof.2. IMPORTANT: The announcements of June/July are two different announcements. In no case it can understand the announcement of July like an opportunity to go up note.DATE PROOFS OF EVALUATION:For concretising

1ST EVALUATION OPPORTUNITY (JANUARY)

Final Delivery - Tuesday 16 January 2024

2ND EVALUATION OPPORTUNITY (JULY)

Consult dates at: http://belasartes.uvigo.es/gl/docencia/exames/

Students must present the same number of projects according to the same parameters that were transmitted during the course of the course. It must be based on the same type of thematic content, objectives to be achieved and development methodology, stipulated during the teaching of the subject.

The three projects will be carried out again and delivered individually by each student, regardless of whether during the teaching of the subject, in the 1st term and until the call (January), any of them were carried out in a group. That is to say, they must consist of a completely different work from the one carried out and handed in at the 1st Call (January).

It will not be possible, therefore, to re-submit any work already assessed (either positively or negatively) in the 1st call (January), being obligatory to re-submit all the work required for the July call.

This work must be done, until the date of the July exam, under the supervision of some or all of the teachers of the subject and, therefore, the teachers must know the process of carrying out this work and know that it will be presented as a result to be assessed in the July exam. Students must maintain contact with the teachers involved during the stipulated tutorial timetables.

Methodologies	Description
Debate	The students will be asked by the professor to solve four major problems throughout the course. This is interlaced with lectures given by the professor and also by invited professors specialized in specific themes about perception that can transcend the work of art. Chaos is sought as a debate and as the identity of another order.

Lecturing	Introduction to the proposed theme accompanied by audiovisual material or other media. Debates: for every two questions, there is a workshop of ideas, where each student presents his or her opinion in the presence of others, creating a special relationship with the whole group.
Problem solving	Individualized student care continues at every stage of every exercise. For each exercise, there is an ideas laboratory, where each student presents his or her opinion, creating a special relationship with the whole group.
Studies excursion	Visits to Sculpture and Art parks.

	Description
Mentored work	The students will work individually in the classroom with a continuous orientation by the professor. During this period, the professor also will give to the students a critical orientation of the projects, respecting the fundamental interests of the creative project of the student. In addition to these tasks, the professor will propose activities as a visualization and critical comment of videos, open comments about the evolution of the students projects, etc.
Workshops	Short length seminars with a specialist inside the area of knowledge. These seminars can include conferences and another type of practical methodologies.
Studies excursion	Visit an Art Center, artist community, artist study related with Live Art.
Debate	We will propose different debates involving live art issues. In order to prepare these debates we are going to use different information sources: basically video and theoretical articles. If it is necessary, these articles will be writing in English.

Other comments

The contents and actions that structure and conform the practical projects that the students present during the course and during the exams never are determined by the professor. These contents and actions build a personal project and are chosen freely by the student who is the only one person responsible for his/her acts.

For these reasons, the professor is not responsible for the consequences that could derive of the process of creation/presentation of the students practical projects and exams.

7. SYSTEM OF EVALUATION

&*nbsp;

7.1. CRITERIA OF EVALUATION

&*nbsp;

The method of evaluation of the subject, will make of continuous form under a work of follow-up in the classroom of the process of development of the personal works presented by each to student, and governs in base to the following criteria:

7.1.1. General criteria of evaluation

The artistic and functional interest of the works of design made. The student will have the option to establish a debate inside the group of the class in defence of the assessment of his work. In contrary case the professor will value this appearance unilaterally.

The understanding and correct utilisation of the technical and computer processes.

The capacity of experimentation and the curiosity researcher of the student.

The coherence or incoherence of all the exercises of the student.

The methodology and planning of the work. Work of reflection and previous study to the process of the preparation of a design.

The assistance to class and suitable attitude and interest in the classroom

The correct realisation of the works and proofs required in the subject in the terms stipulated.

7.1.2. Criteria of evaluation of the matter.

&*nbsp;

Practical.

The formal coherence, aesthetic and conceptual of the elements used in the exercise and his *adecuación to the proposal.

The visual hierarchy and composition.

The correct formal preparation (digital and of impression) and his good presentation.

The creativity and originality in the approach of the exercise inside the specificity and the guidelines of the project as well as the interrelationships with the proposals of the Contemporary Design.&*nbsp;

Theorist

The enlargement of the knowledges given in class.

Understanding in depth of the concepts that have explained and the consistent clarity of expression of the same.

Capacity of analysis and of relation between different contents.

Correct use of the terminology and of the appointments.

Originality and rigour in the approach of the subject.

Good presentation of the exercises and works proposed.

To the hour to evaluate, differentiated clearly, the minimum contents whose *superación suppose the approve the matter and of which serve to establish punctuations higher.

It will not collect any work and therefore it will not be evaluated, those students(ace) that have not delivered previously &*nbsp;the index card of the matter with a recent photo.

7.2. Ordinary announcement of December

For the evaluation of the academic course in the announcement of December and like this approve by course, the *profesorado will demand the minimum presentation of a series of deliveries-corrections of the work of the course along the *cuatrimestre and that the student will have to surpass with a minimum qualification of [sufficient] in the dates stipulated. These deliveries-corrections will complete with the final delivery of the Global Personal Project.

DELIVERY OF WORKS: The student(to) will be forced to the deliveries-corrections of the work(*s) proposed(*s) by the professors during the academic course.&*nbsp;

it will be necessary to make at least 80% of these deliveries to be able to be evaluated.

PROOF *TEORICA-PRACTISES: In addition to said delivery, the professors reserve the option to make a theoretical proof and another practice in case to consider it necessary, consisting:

-&*nbsp;

Proof of theoretical character,

&*nbsp;based in the specific contents of the programming. Only in the case that the student surpass this exercise will happen to make the following proof of practical character.

-&*nbsp;

Proof of character practise

, consistent in the realisation of a work based in the practices developed during the course. (Practical exercise in the computer, *Indesign and *Illustrator)

&*nbsp;To approve the matter through the system of \square proofs of recovery \square , is indispensable to surpass the two parts that form this announcement: - Delivery of the exercises&*nbsp; - Tests theoretical-practical.&*nbsp;

7.3. Extraordinary announcement of Julio:

When the student(to) do not reach the level demanded or do not present to the normal announcements of evaluation of the course, articulates a system of [proofs of recovery]. Besides the student(to) will have of the extraordinary announcement of Julio.

DELIVERY OF WORKS: The student(to) will be forced to the deliveries-corrections of the work(*s) proposed(*s) by the professors during the academic course.&*nbsp;

it will be necessary to make at least 80% of these deliveries to be able to be evaluated.
